Subject: FW: request for document for WLL

Terrie, since I expect this won't be the last document you'll need to get from me as you assist the CAG, I would like to get you access to our Environmental Science Connector page for West Lake. This will make transferring files easier, and there's already a wealth of historic documents in there which you may also find useful. Here's how to get into the ESC:

How do my external collaborators join the Environmental Science Connector?

To access the Science Connector, non-EPA users (e.g., EPA contractors, co-op students, and AAA fellows) must request access to the EPA Portal. To do this, go to: <http://portal.epa.gov> and click on "Request Access to the EPA Portal." A Portal page will open with a form for you to complete to request access. Once you complete and submit the form it will be routed to the Portal Administrator for approval. It may take 24 to 48 hours to complete this process.

This Portal page will ask you for a "sponsor" who will approve your access. That's me.

Sincerely,

Daniel R. Gravatt, PG

Dan – can you provide baseline risk assessment to Terrie, and if we should place on website let me know. Ben is out sick today.

Hi Belinda and Ben,

I hope you had a nice holiday. Is Ben back from paternity leave yet? I have a new granddaughter. She was born the day before Thanksgiving.

In our TASC work plan for West Lake Landfill, we are supposed to review the risk assessment, but I can't find it on the EPA website. Can you post it or send a copy? The citation in the Supplemental FS is - Baseline Risk Assessment (BRA) (Auxier & Associates, 2000).

I was scheduled to attend a Community Group meeting on Thursday, January 9. But, it was cancelled due to weather. The meeting is rescheduled for January 15.

Thanks.

Terrie
